OVERVIEW

CEQA, or the California Environmental Quality Act, is a statute that requires state and local agencies to identify the significant environmental impacts of their actions and to avoid or mitigate those impacts, if feasible. CEQA requires public agencies to conduct environmental review before making a determination on a project. The environmental review process examines the potential impacts your project will have on the property and its surroundings, and makes recommendations (mitigation measures) on how to minimize or reduce those impacts that are found to be significant. The purpose of this application is to assist staff in determining the appropriate environmental clearance for your project. Please fill out this form completely. Missing, incomplete or inconsistent information will cause delays in the processing of your application.
